**OmniForm 5.0 is required** for workstations to scan, design, view, and complete forms through WorkPlace EMP. OmniForm is third party software developed by Nuance Communications. SyMplify Technologies does not distribute, license, or sell OmniForm. You can learn more or purchase OmniForm from <http://www.nuance.com/omniform/standard/>.

**Scanners are required** to scan the forms and applications and supporting employee documents. Scanners must be compatible with Nuance’s OmniForm software. SyMplify does not recommend or support the use of network scanners, as forms must be scanned directly through OmniForm. An individual scanner is not required for each workstation.

**Microsoft Office is required** only if licensed for the Data Export Tool, a WorkPlace EMP premium module.

Note: The hardware, software, and other materials required pursuant to this Exhibit are to be provided by Licensee at its own cost and expense. They must be installed and in working order prior to Software System installation. SyMplify Technologies strongly recommends having a backup plan in place to preserve critical database files.
